EXAMINERS AMENDMENT

1. An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to the applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this amendment was given in a telephone interview with Jeffrey Barclay on October 2, 2008.
3. The claims have been amended as follows:
 - a. Claim 1, line 11, the words "one or a" have been replaced with the words --one of a--.

Allowable Subject Matter

4. Claims 1 - 4 are allowed over the prior art of record.
5. Following is an examiner's statement of reasons for allowance.
6. While Harris ("Physically-Based Visual Simulation on Graphics Hardware") teaches generating a plurality of 2D grids, each grid being independent and having a plurality of grid points; associating movement information with each 2D grid point; changing the movement information associated with the 2D grid points over a time period that includes discrete intervals; defining a region of 3D space using the 2D grids; and Gamito ("Two-dimensional simulation of gaseous phenomena using vortex particles") teaches advecting the plurality of elements through the region of 2D space using the movement information associated with the 2D grids, neither of these references, either alone or in combination with the prior art of record teaches a method and apparatus for simulation advection of a plurality of elements through space, specifically including:

Art Unit: 2123

- a. Regarding claim 1, "by associating a component with each 2D grid point to form a respective 3D vector, each component including one of a rotational portion and a linear portion, and by adding a pseudo-random 3D vector to each respective 3D vector to form one of a symmetric 3D vector and a non-symmetric 3D vector", in combination with the remaining features and elements of the claimed invention;
 - b. Regarding claim 2, "by associating a component with each 2D grid point to form a respective set of 3D points, each component including one of a rotational portion and a linear portion, and by adding at least one pseudo-random 3D point to each respective set of 3D points to form one of a set of symmetric 3D points and a set of non-symmetric 3D points", in combination with the remaining features and elements of the claimed invention;
 - c. Regarding claim 4, "by associating a component with each 2D grid point to form a respective set of 3D points, the component including one of a rotational portion and a linear portion, and by adding at least one pseudo-random 3D point to each respective set of 3D points to form one of a set of symmetric 3D points and a set of non-symmetric 3D points", in combination with the remaining features and elements of the claimed invention;
7. It is for these reasons that the claimed invention distinguishes over the prior art of record.
 8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
